

DEUTSCH-CHINESISCHE  
GESELLSCHAFT f. MEDIZIN e.V.  
(DCGM) 德中医学协会

36TH ANNUAL CONFERENCE OF DCGM (DEUTSCH-CHINESISCHEN  
GESELLSCHAFT FÜR MEDIZIN) AND CDGM (CHINESISCH-  
DEUTSCHEN GESELLSCHAFT FÜR MEDIZIN)

# INNOVATIONS FOR BETTER HEALTHCARE

**OCTOBER 9 – 11, 2024**  
University Hospital Regensburg  
Franz-Josef-Strauß-Allee 11, 93053 Regensburg

## Opening Ceremony

Wednesday, 9. October 2024,  
8:00-9:00 a.m.

Main Lecture Hall,  
Regensburg University Hospital

- Musical introduction
- Welcome and opening of the conference by Prof. Dr. Oliver Kölbl, Medical Director, University Hospital Regensburg
- Welcome by Prof. Dr. Michael Nerlich, President of the German-Chinese Society for Medicine (DCGM)
- Greeting Prof. Liu Jihong, President of the Sino-German Society for Medicine (CDGM)
- Greeting Prof. Dr. Udo Hebel, President of the University of Regensburg
- Greeting Representative Free State of Bavaria/ Federal Republic of Germany
- Greeting Representative of the Embassy of the P.R. China
- Musical conclusion

Pre-registration possible at: [www.ukr.de/veranstaltung/dcgm-2410](http://www.ukr.de/veranstaltung/dcgm-2410)

## CONFERENCE PRESENTATION CONCEPT

Innovations in health care are not only accomplished through individual scientific breakthroughs. Innovative models of cooperation in local and regional networks as well as the introduction of technologies from other sectors into the health care arena, such as digitalization (telemedicine and eHealth), artificial intelligence and robotics are equally important. The paradigm shift from the viewpoint of institutions such as hospitals to the viewpoint of patients sets the scene for new ways of thinking. Ideas on how to achieve seamless care, rapid recovery and continuous outcomes research are cru-

cial to constantly improve our health care systems.

This conference offers a unique spectrum of perspectives on health care issues of common interest. We welcome all open-minded health care providers who are interested in broadening their knowledge and generating ideas in their specific fields. Listening to experts from different health care systems and discussing unconventional concepts will broaden our horizons.

Our program offers hot topics for caregivers of all sectors, medical doctors, nursing professionals, associated healthcare staff, hospital administrators

and health care system management representatives. Biomedical scientists and academics will present their latest research results, sharing with us their view on the future of health for all.

We want to spark your curiosity in innovations that may be small but can be convenient in your daily practice. The plenary presentations are teasers to attract your interest, and associated symposia will deepen your understanding. For some of the topics we will offer small group workshops or discussion groups to meet the experts.

## BE CURIOUS!

### GENERAL TRACK – PLENARY SESSIONS:

Short overview presentations on all topics by German and Chinese Experts will give an overview of what is going on and are linked to subject-specific symposia.

## LISTEN AND DISCUSS!

### SPECIFIC SYMPOSIA:

Specific sessions in different medical fields offer room for in-depth presentations and questions as well as open discussions.

## TOUCH IT TO BELIEVE IT!

### ADDITIONAL WORKSHOPS:

The conference site is a top-class University Hospital which offers site visits to patient wards, ICUs and operating and intervention theatres. Small group demonstrations of best practice models that have been successful in daily clinical situations can deepen your understanding of certain procedures in your area of interest.

## SIDE EVENTS:

**Discussion panels** enable industry partners to demonstrate their latest developments in separate B2B Pitch Sessions and facilitate familiarity with the broad spectrum of medical subjects for students, including the multicultural and international aspects of our conference.

The Exhibition Area just in front of the Main Lecture Hall is open to poster presentations, to NGOs offering services and industry product presentations as well as on-site demos of innovative technologies.

**Excursions** to other Medical Centers in the area can be arranged.

Pre-registration possible at: [www.ukr.de/veranstaltung/dcgm-2410](http://www.ukr.de/veranstaltung/dcgm-2410)

## PRELIMINARY PROGRAM – WEDNESDAY, OCTOBER 9, 2024

| PLENUM      |   | SYMPOSIA    |  | NURSING   |  |
